Patented mirror makes driving safer, easier for seniors

Driving equals freedom for most people. So any product that enables people to drive safely and comfortably is a welcome addition. The patented ALLVIEW Mirror System (AMS) is such a product. Its unique patented design makes lane changes safer and easier for drivers of all ages and skill levels — especially for seniors and the mobility impaired.

“As we age, our peripheral vision declines,” says Toby Joe, founder of ALLVIEW Mirrors Corp. and inventor of AMS. “The ALLVIEW Mirror System helps seniors compensate for these physiological changes. It also helps people with back or neck mobility impairments, who may have trouble turning their head to check for blind spots. Some seniors also have increasing trouble judging the distance of approaching vehicles.” According to Joe, the AMS makes driving easier for all of these people.

The AMS mounts to the windshield, right in front of the driver. It clearly shows a vehicle's location in reference to other cars. There's no need to check blind spots or the outside mirrors. It allows drivers to decide quickly if it is safe to change lanes.

ALLVIEW offers three designs of the mirror for various locations in the car.

For more information, contact ALLVIEW Mirrors Corp., PO Box 92078, City of Industry, CA 01715 or call toll free 1 (866) 200-8740, or visit www.allviewmirror.com. *PSN*
